

Lahti Precision Services

Professional Solutions for Maintenance

Lahti Precision Services

Lahti Precision Oy has supplied hundreds of weighing and dosing systems and plants during its 100-year activity, as well as dozens of thousands of weighing devices. The company has acquired exceptionally broad experience in handling bulk materials in different areas of industry.

PROFESSIONAL SOLUTIONS FOR MAINTENANCE

Customers all over the world know Lahti Precision as reliable partner from which they can get products, solutions and services customised to their needs, easily from the same place.

Lahti Precision Service keeps the production of its customer companies running with reliable basic services: maintenance, calibration and full range spare part services.

In addition to the basic services our maintenance experts help customers to improve productivity with factory-wide inspections, life cycle analyses, maintenance contracts, modernising projects and versatile training services.

The objective of partnership agreements is to plan and anticipate the maintenance activities for production equipment and processes in close co-operation with our customers. We provide professional service to maintain equipment and plants during the entire life cycle.

Experience that weighs

Lahti Precision started manufacturing scales in 1914. Today our company is an expert in dosing, weighing and mixing applications supplying batching plants for glass industry, drymix plants and services globally. Our vast experience in core technology guarantees excellent dosing accuracy and consistent mixing quality. We help our customers to succeed in their own production by working closely together, finding the best solutions for the actual need. This ensures our customers the lowest cost of ownership.
